

Bring Your Own Device (BYOD) Setup

If you are in a Bring Your Own Device program, your laptop must be configured to connect to MTI's network. This should be completed from home before coming to campus on the computer you are using to complete your program.

(This is for personally owned devices not purchased through MTI)

Instructions and link to the video guide are included on a separate page in this letter. The video guide link is on the Technology Tab on MyMTI.

Any issues stop in the Technology Center, Room 156 (IT Help Desk) or submit a Help Desk ticket (can be found on the top of the page of mitchelltech.edu) and we will do our best to assist remotely.

The IT Help Desk is open Monday through Friday from 8 a.m. to 4 p.m.
